Personal Profile

A motivated and dependable person from Cambridge who is very interested in technology, solving problems, and learning new things all the time. I have a Level 3 Diploma in Computer Engineering and have gained real-world experience through web development projects, freelance work, and self-study. I am good at using digital tools, working with others, and making my point clear. I can work alone or with others and still be organised, flexible, and responsible when it comes to getting things done. I'm now looking for a job where I can keep learning, make a positive contribution, and gain more professional experience.

Key Skills

- Strong communication and teamwork skills
- Good time management and organisation
- Problem-solving and attention to detail
- Able to learn new systems and software quickly
- Customer service and professional communication
- IT and digital skills
- Web development and technical project experience
- Basic database and back-end knowledge
- Experience using GitHub and digital collaboration tools
- Able to work independently and take initiative

Technical Skills

- Microsoft Office / general computer use
- HTML, CSS, JavaScript
- WordPress and website editing
- Basic PHP and MySQL
- GitHub and version control
- Next.js, React, and Tailwind CSS
- Digital content management and testing

September 2023 – Jun 2025

GCE Ordinary Level Examination – Sri Lanka Ministry of Education

- English Language – A
- Information & Communication Technology – A
- Mathematics – A
- Science – B

Work Experience

Freelance Web Developer – Brimstone Energy UK

Remote · Jun 2025 – Sep 2025

- Modernised the company's WordPress site using the Stax theme, aligning each change with brand guidelines.
organictthemes.com+1

- Worked within the existing hosting and plugin setup, ensuring changes were safe and reversible.
- Coordinated with the director on structure, content, and priorities, providing updates and asking for feedback at each stage.
- Tested pages across devices/browsers and logged issues/fixes systematically.

(Other non-IT work history available on request—kept off this CV to focus on WordPress and development.)

Professional Experience

Brimstone Energy UK – WordPress Website Redesign (<https://brimstone-energy.uk/>)

Freelance Web Developer · Remote · Jun 2025 – Sep 2025

- Worked with Brimstone Energy UK, a renewable energy company, to refresh their marketing site using the Stax WordPress theme and WordPress Full Site Editing.
- Built and refined page layouts for the homepage, services, and supporting pages using theme blocks/patterns, ensuring the site stayed consistent with the existing brand.
- Structured content sections (hero, value propositions, testimonials, CTAs) to support conversions while keeping typography and spacing consistent.
- Checked layouts on desktop, tablet, and mobile, fixing alignment, spacing, and stacking issues for a fully responsive experience.
- Updated navigation, internal links, and resource downloads so existing URLs, PDFs, and blog posts remained usable.
- Collaborated directly with the director on copy tweaks, priorities, and sign-off, providing clear change notes and screenshots for each round of revisions.
- Followed a simple maintenance routine (content updates, minor styling changes, and sanity checks after theme/plugin updates provided by hosting).

Personal Portfolio – (<https://sathis.dev/>)

Next.js / Front-End Project · 2025

- Designed and built my own portfolio site hosted on Vercel, showcasing projects like Brimstone Energy and Silent Help.
- Implemented a responsive layout with Next.js, React, and Tailwind CSS to demonstrate modern front-end practices.
- Used this project to strengthen my knowledge of performance, accessibility basics, and clean component structure.

Key Technical Projects

MentorAI-Discord (AI Learning Bot) | *GitHub: sathis-dev*

- Developed a gamified learning bot using Discord.js and the OpenAI API, featuring automated quizzes and an XP system.
- Demonstrates proficiency in asynchronous JavaScript and complex logic handling.

Silent Help—Emotional Support Web App (Non-WordPress)

Full-Stack Learning Project · 2025–Present

- Next.js + TypeScript project exploring AI-assisted emotional support flows (check-ins, SOS flows, content library).
- Focused on clear routing, reusable components, and maintainable file structure.
- Although not WordPress-based, this project improved my JavaScript, API, and general web architecture understanding.

Additional Information

- Based in Cambridge, UK
- Strong interest in IT, digital technology, and professional development
